

2:30 PM

Huey

We can give everyone a number from 1 to 60. Then, we can roll 10 number cubes and add the results. The person whose number is equal to the sum wears the costume.

That doesn't seem fair. How about this?

Everyone gets a number from 0 to 59. Put blocks numbered 0 to 5 in a bag. In another bag, put blocks numbered 0 to 9. Pick a block from the first bag for the tens digit and a block from the second bag for the ones digit.
